

## Science Homework on the Network- How do antacid tablets work?

<b>Term</b>	Autumn	<b>Year group</b>	7
-------------	--------	-------------------	---

### How this fits into your learning:

You will use what you have learned about acids and alkalis to explain how an antacid tablet works

### Objective:

To use your knowledge of acids and alkalis to describe the neutralisation that happens.

To use models of particles to show what chemicals are reacting and how they do so

<b>How this will be assessed</b>	teacher	self	peer
----------------------------------	---------	------	------

### Task:

Chose the correct level of instructions (based on your current level).

Read the instructions and follow them.

Use the level marking criteria to guide what should be in the homework.

### Resources:

Paper

Colouring pencils

PC if you wish to complete and electronic version

### Example/Model:

None

### Check your level:
