

## Science Homework on the Network- The Problem of Acid Rain in Canada

<b>Term</b>	Autumn
-------------	--------

<b>Year group</b>	9
-------------------	---

### How this fits into your learning:

You will find out about the causes of acid rain and the effects that pollution from one country can have on other countries such as Canada. Also what we are doing to reduce the effects.

### Objective:

To research about acid rain and its effects in Canada  
To combine this knowledge into a report, including quoted references.

### How this will be assessed

teacher
---------

self
------

peer
------

### Task:

Research acid rain and its effects in Canada.  
Follow the instructions on the criteria sheet.
